

	<i>Solution Mining Manager - Job Description</i> Western Potash Corp.	
	Issue Date:	August 21, 2018

Position Title: Solution Mining Manager

Location: Regina, Saskatchewan, Canada

Job Summary

Western Potash is a potash mining company located in Regina, Saskatchewan, Canada. Our company is a wholly-owned subsidiary of Vancouver-based Western Resources Corp. which is publicly listed on the Toronto Stock Exchange. We are currently looking for a Solution Mining Manager to join our team, and together develop the Milestone Phase I Potash Project.

This position is responsible for leading the internal solution mining team to successfully design, construct and operate the drilling and solution mining. This will entail managing consultants, engineering firms, sub-contractors, vendors and internal team to meet the project goals. This is a key role that requires the individual to have extensive drilling and potash solution mining experience.

General Accountability & Objectives:

The Solution Mining Manager will mainly be responsible, without limitations, for the following tasks:

- Responsible to lead the Drilling and Solution Mining (D&SM) for the Phase I Project, including the engineering, design, throughout the construction and installation and into operations;
- Manage the development of the final detail engineering, as well as execution plan for the construction and operation of the solution mining brine field;
- Interface with engineering firms, consultants, vendors, sub-contractors and internal teams to ensure the best design, construction, installation and operation;
- QA/QC and approve the final release of D & SM engineering deliverables;
- Deliver all requirements for project development, execution and operations in D&SM;
- Ensure all related health, safety, environment and regulatory requirements are met in D&SM;
- Prepare regular update reports and presentations to management, and participate in vendor / engineering / team and management meetings.
- Attend meetings with senior management, team, consultants, contractors and vendors as required. Travel as appropriate to meetings, vendors or conferences;
- Assist in the planning of resources to achieve project objectives on budget and schedule, including construction and operations;
- Assist in development of risk management plan including identification and evaluation of engineering/technical/construction/operation risks. Ensure implementation and follow-up of action items;
- Co-ordinate with consultants to develop SM operations manual and other related documents or reports;

	Issue Date:	August 21, 2018

- Assist with all aspect of the project including processing, to ensure best possible design and operation;
- Provide on-site leadership for the construction, commissioning, startup, ramp-up and operation phases of the project
- Other tasks as appropriate

Qualifications and Skills

The ideal candidate should have the following qualifications and skills:

- 5 years-experience in drilling and solution mining industry
- Appropriate professional engineering qualifications
- Canadian and / or North American experience is an asset
- Strong written and oral communication skills in English
- Excellent time management skills
- Able to work with multiple tasks and meet deadlines
- References required upon interview

Benefits

We offer a competitive wage and benefits, and the position is full time and available immediately. If you are interested please send your salary expectations, cover letter and resume to: jobs@westernresources.com. We thank all candidates who apply, however, we will only respond to those that are granted an interview.
