

Solution Mining Manager - Job Description

Western Potash Corp.

Schedule - A

Position Title: Solution Mining Manager

Location: On-Site near Regina, Saskatchewan

Reports To: VP Projects / VP Technology

Job Summary

Western Potash is a potash mining company located in Regina, Saskatchewan, Canada. Our company is a wholly-owned subsidiary of Vancouver-based Western Resources Corp. which is publicly listed on the Toronto Stock Exchange. We are currently looking for a Solution Mining Manager to join our team, and together develop the Milestone Phase I Potash Project.

This position is responsible for leading the internal solution mining team to successfully design, construct and operate the drilling and solution mining. This will entail managing consultants, engineering firms, sub-contractors, vendors and internal team to meet the project goals. This is a key role that requires the individual to have extensive drilling and potash solution mining experience.

General Accountability & Objectives:

Reporting to the VP Projects / VP Technology, the Solution Mining Manager will mainly be responsible, without limitations, for the following tasks:

- Support Western Potash HSSE policies and procedures
- Ensure compliance to all company policies, procedures and guidelines, including all purchasing policies and procedures.
- Responsible to lead the Drilling and Solution Mining (D&SM) for the Phase I Project, including the engineering, design, throughout the construction and installation and into operations;
- Manage the development of the final detail engineering, as well as execution plan for the construction and operations of the solution mining brinefield;
- Interface with engineering firms, consultants, vendors, sub-contractors and internal teams to ensure the best design, construction, installation and operation;
- Approve the final release of D & SM engineering deliverables;
- Deliver all requirements for project development, execution and operations in D&SM; develop and manager the internal mining budget;
- Ensure QA/QC of D&SM engineering deliverables;
- Establish strategic goals for D&SM areas; determine areas of responsibilities, establish course of action, define objectives and evaluate outcomes;
- Manage engineering, contractors and consultants work scope and corresponding schedule and budgets to ensure a successful project;
- Assist with all aspect of the project including processing, to ensure best possible design and operation;
- Provide on-site leadership for the construction, commissioning, startup, ramp-up and operation phases of the project
- Prepare regular update reports and presentations to management, and participate in vendor / engineering / team and management meetings.

*Solution Mining Manager - Job
Description*

Western Potash Corp.

- Attend meetings with senior management, team, consultants, contractors and vendors as required. Travel as appropriate to meetings, vendors or conferences;
- Assist in the planning of resources to achieve project objectives on budget and schedule, including construction and operations;
- Assist in development of risk management plan including identification and evaluation of engineering/technical/construction/operation risks. Ensure implementation and follow-up of action items;
- Co-ordinate with consultants to develop SM operations manual and other related documents or reports;
- Other tasks as appropriate

Requirements

- 5+ years of potash solution mining experience required.
- Mine Management experience highly desirable
- Must be legally authorized to work in Canada.
- Able to travel both within Canada and internationally as required.
